Work Experience

Software Engineering Intern - The Walt Disney Company

Summer 2025

- *AWS, Spring Boot, GraphQL, Computer Vision, PyTorch, Kotlin, Java*
- Developed and deployed an AWS Step Function pipeline and full-stack application integrating AI-driven analysis to detect scene locations and end credit timecodes in video content, outputting structured, JSON metadata for use within Disney streaming services
- Implemented a backend system utilizing machine learning to detect optimal ad break points in live sports broadcasts, and developed an API for production teams to post, retrieve, and manage the timestamps and ad markers

Software Engineering Intern - Prudential Financial

Summer 2024

- *AWS, Angular, Spring Boot, Salesforce, Python, Java, React*
 - Designed and implemented efficient automated solutions for data transformation and movement, streamlining seamless ETL data flow both within and outside the company to be accessed by end users
 - Built and deployed responsive web pages for internal service management and viewing, enhancing user experience and operational efficiency between businesses
-

Education

Boston College, Morrissey College of Arts and Sciences; Chestnut Hill, MA

Bachelors of Science in Computer Science, Math

May 2026

Relevant Coursework: Computer Systems, Machine Learning, Randomness & Computation, Algorithms, Computer Organization, Multivariable Calculus, Linear Algebra, Differential Equations, Logic & Computation

Technical Skills

Java, Kotlin, Python, C, C++, Git, SQL, React, Docker, Spring, AWS, REST API, Node, Swift, GraphQL

Projects

AllAboard - Swift, Firebase, Figma

Spring 2025

- Built a location-based messaging app that connects studying abroad, enabling real-time conversations, local advertisements, and community building in countries around the globe
- Designed a dynamic chat infrastructure, enabling scalable, city-based chat threads and delivering a seamless messaging experience tailored for student communities internationally

BestBettor - React, Node.js, AWS, PostgreSQL

Summer 2024

- Developed an innovative sports betting app that provides a platform for players to create lobbies around bets only from a selected game
- Delivers real-time updates, odds, and stats, ensuring a reliable and engaging experience

Fortune 500 Sustainability Index - React, Node.js, AWS, SQLite

June 2024

- Created and maintains web application that hosts a live database populated with live and historical Fortune 500 stock and emission data to sort companies by industry
 - Provides stock analysis and metrics based on financial performance, market trends, and sustainability indicators, including a customized "sustainability rating" for comparing companies independent of size
-

Involvements

-Computer Science Society

-BC Blockchain

-Ocean Conservation Club

-Puerto Rican Student Association

-Sports Analytics

-Investment Club
